SUMMARY

Motivated Computer Science (Data Science) student specializing in full-stack development and applied AI. Skilled in React.js, Python/Java, and SQL/MongoDB, with hands-on experience in designing and developing innovative solutions that integrate AI and data-driven insights. Known for strong teamwork, analytical thinking, and a passion for continuous learning to transform ideas into impactful technologies.

EDUCATION

GM University Davanagere,Karnataka

B.tech in Computer Science-Data Science(cgpa-8.94/10.00) *2024-2027*

EXPERIENCE

AltimetrikSLK Bengalure,Karnataka

Project Intern – AI Altimetrik Private Ltd. *Jul 2026 – Sept 2026*

PROJECTS

AI-Based Resume Analyser For Job Seekers *03/2025-06/2025*

- **Resume Analyzer** is an AI-powered web application
- Powered by Aspire AI, a real-time chatbot, this tool offers deep insights including resume scoring, SWOT analysis, and predicted career trajectories.

Development of a Digital Mental Health and Psychological Support System *09/2025-present*

- Addressing the Growing **Mental Health Challenges** Among Students and Communities Through a Digital Support System
- Using react+vite, Tailwind CSS, TensorFlow, Hugging Face Models

4× Department Website Development – GM University *09/2025-12/2025*

- Developed and deployed four official department websites for GM University, delivering production-level academic portals with responsive UI, structured content management, and optimized performance.
- **Departments Developed:**
  - Data Science Department – https://gmu.ac.in/data_science/
  - Civil Engineering Department – https://civil-dept.netlify.app/
  - Biotechnology Department – https://gmu.ac.in/biotech/
  - GM School of Law – https://gmu.ac.in/LLb/

Agentic AI for Securing Home IoT Devices *01/2026-02/2026*

- Developed an Agentic AI-based autonomous security system to detect and respond to vulnerabilities in home IoT devices in real time.
- Implemented intelligent threat monitoring, anomaly detection, and automated mitigation workflows for enhanced cybersecurity.
- Achieved 2nd Runner-Up in Track 1 at the e-Raksha Hackathon for innovation and real-world impact.

IP-SAKTI Sahayak *present*

A multilingual, RAG-based, source-cited AI assistant for Intellectual Property and regulatory guidance in Ayurveda — built as a governed, evidence-first system spanning India's national frameworks and international regimes.

TECHNICAL SKILLS

Programming: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python, C
Frontend: Bootstrap, Tailwind CSS, React
Backend: Flask, FastAPI, Embedding
Databases: MySQL, MongoDB, Supabase, Vector DB
AI/ML: Scikit-learn, OpenCV, Machine Learning, Agentic AI, RAG, OpenSourceLLM

ACHIEVEMENTS

SIH 2024 Grand Finalist- At KIET Group of Institutions *Dec 2024*

Bureau of Indian Standards- Standard Writing Compitation 3rd Prize *June 2024*

Achieved 2nd Runner-Up in Track 1 at the e-Raksha Hackathon at IIT Delhi *Jan 2026*

Selected and participated in the International Gemini AI Hackathon @ Google Japan. *June2026*
